TWENTY-SEVENTH ANNUAL REPORT LLINOIS LINOIS LINOIS

OF THE

TFADE AND COMMERCE

OF

CHICAGO,

FOR THE

YEAR ENDED DECEMBER 31, 1884.

COMPILED FOR THE

BOARD OF TRADE,

BY

GEORGE F. STONE, SECRETARY.

CHICAGO:
KNIGHT & LEONARD, PRINTERS.
1885.

INDEX.

Officers of the Board of Trade, 1884	vi
Officers of the Board of Trade, 1885	vii
Executive Officers of the Board of Trade, 1848 to 1885, inclusive	viii
Members of the Board of Trade Deceased in 1884	ix
Secretary's Review	xi
Report of the Board of Directors	xxxi
General Statistical Statements	1
Population Statistics of the United States, Illinois and Chicago	2
Exports and Imports of the United States for a series of years (values)	3
Domestic Exports of the United States (detailed) for three years ended	
June 30	4
Imports into the United States (detailed) for three years, ended June 30	5, 6
Recapitulation of Exports and Imports, and Coin and Bullion movement,	6
Exports of Breadstuffs to Europe since 1847 (quantities)	7
Total Exports of Flour and Grain for six years	7
Exports of Flour, Wheat and Corn from the principal Atlantic Ports	
(weekly) in 1884, with its distribution	8
Exports of Flour, Wheat and Corn from the principal Atlantic Ports	
(weekly) in 1884, by Ports of Shipment	9-11
Exports of Hog Product from the principal Atlantic Ports (weekly) in	
1884	12
Exports of Beef, Hog Product, Butter and Cheese during the year ended	
June 30, 1884, with its distribution	13
Nationality of Vessels engaged in the Foreign Commerce of the United	
States, 1860 to 1884, inclusive	14
Statement showing the number of Alien Passengers arrived in the United	
States, 1821 to 1884, inclusive	15
European Wheat Crops for the past ten years	16
Public Debt of the United States annually since 1790	17
Detailed Statement of the Public Debt December 31, 1884	18
Receipts of Flour and Grain at the principal Western River and Lake	
Ports, 1880 to 1884, inclusive	19
Grain Crops of the United States in 1883, by States, United States Agri-	
cultural Department estimate	20, 21
Product of Wheat, Corn and Oats in 1884, by States, United States Agri-	
cultural Department preliminary estimate	22, 23
Acreage and Product of Wheat, Corn and Oats in Illinois in 1884, by	
Counties, State Agricultural Department estimate	24, 25
Date of First Frost, 1871 to 1884, inclusive	26, 27
Acreage, Yield and Value of the Wheat, Corn, Oats, Rye and Barley	
Crops of Illinois, 1860 to 1884, inclusive	28
Valuations of Property (for purposes of Taxation) in Illinois, State	
Debt, etc.	29
Valuations of Property (for purposes of Taxation) in the City of Chicago,	
Taxes Levied, City Debt, etc	30
Illinois and Michigan Canal and Illinois River Improvement, Earnings	
and Expenses	31

Illinois and Michigan Canal, Clearances, Boats Running, Miles Run,	
Tons transported	32
Illinois Central Railroad, Earnings and Tax	33
Pork Packing in the Mississippi Valley, Number of Hogs Packed at the	
Principal Points in the last five (winter) packing seasons	34, 35
Pork Packing in the Mississippi Valley for a series of years (summer	
and winter packing)	36
Detailed Statement of the Pork Packing at Chicago, winter season of	
1883-4, and aggregates of previous years	37, 38
Number of Hogs Packed at Chicago, Year ended March 1, 1884	39
Detailed Statement of Weekly Shipments of Hog Product	40, 41
Hog Products Exported from United States to Germany and France	42
Statistics of the Cattle and Hog Movement and of the Packing Business	
at Chicago for twenty-one years	43
Number of Cattle Slaughtered at Chicago	44
Receipts of Flour and Wheat at Chicago from Twenty-five Crops	45
Receipts and Shipments of Flour and Grain at Chicago for a series of	10
years	46, 47
Receipts and Shipments of Various Commodities at Chicago for a series	40, 41
of years	48, 49
Semi-Monthly Prices of Mess Pork and Prime Steam Lard in Chicago	40, 49
·	50 E1
for nine years.	50, 51
Semi-Monthly Prices of Flour, Wheat, Corn and Oats in Chicago for	50 50
seven years	52, 53
Lowest and Highest Monthly Prices of Corn for a series of years	54
Rules Governing the Inspection of Grain in Chicago	5 5–5 8
Commission Charges established by the Board of Trade, Chicago	59
Rates for Inspection and Weighing in Chicago	60, 61
Detailed Annual Statistics of Chicago for 1884.	63
Value of Goods Imported and Duties on same	64
Description and Quantities of Imported Goods	65
Duties Collected Monthly for five years	66
Value of and Duties on Imported Goods Warehoused, by months	66
Business of the Inspector's Office, Custom House	67
Exports by Lake to Canada for seven years	67
Internal Revenue Collections by months	68
Clearing House Statement, by months, five years	68
Exports from Chicago with Benefit of Drawback	69
Board of Trade Clearing House Statement	69
National Bank Statements, December 31	70
Receipts of Flour and Grain, weekly	71
Shipments of Flour and Grain, weekly	72
Stocks of Flour and Grain, weekly	73
Visible Supply of Grain, weekly	74
Elevator Capacity for Grain Storage	75
Elevator Rates of Charges for Grain Storage	75
Inspections of Grain, car loads, by months	76, 77
London and Liverpool Wheat and Corn Quotations	78, 79
Direct Exports of Produce to Europe	80
Exports of Produce to Canada by Lake	81
Receipts and Shipments of Various Commodities, by routes	82, 83
	•

All Rail Transfer Business in Flour and Grain	84, 85
Statement showing the Entire Movement of Flour and Grain	86, 87
Flour Manufactured in Chicago	88
Monthly Stocks of Flour in Chicago for five years	88
Weekly Prices of Flour	89
Receipts and Shipments of Flour and Wheat, by routes and by months	90
Weekly Prices of Wheat.	91
Receipts and Shipments of Corn and Oats, by routes and by months	92
Weekly Prices of Corn and Oats.	93
	94
Receipts and Shipments of Rye and Barley, by routes and by months	
Weekly Prices of Rye and Barley	95
Receipts and Shipments of Cattle and Sheep, by routes and by months	96
Receipts and Shipments of Hogs (Live and Dressed), by routes and by	
months	97
Weekly Prices of Cattle, Hogs, and Sheep	98
Weekly Prices of Beef Product	99
Weekly Prices of Hog Product	100, 101
Monthly Stocks of Hog Product	102
Receipts and Shipments of Hog Product, other than Lard, by routes and	
by months	103
Receipts and Shipments of Lard and Butter, by routes and by months	104
Weekly Prices of Butter, Cheese, and Eggs	105
Daily Prices of Wheat, Corn, Oats, Mess Pork and Lard for future	
delivery	106-117
Receipts and Shipments of Seeds, by routes and by months	118
Weekly Prices of Salt and Seeds.	119
Receipts and Shipments of Wool and Hides, by routes and by months	120
Weekly Prices of Wool and Hides	121
Receipts and Shipments of Coal, by routes and by months	122
Monthly Prices of Coal and Hay.	123
Distilled Spirits, Manufacture and Prices of	124
Weekly Prices of Potatoes and Beans	125
Lumber Statistics, Stocks	126
Receipts and Shipments of Lumber and Shingles	126
Sources of Supply of Lumber and Shingles received by Lake	127
Cargo Prices of Lumber, Shingles, and Lath	128
Freights on Grain by Lake and Erie Canal	129
Lake (Steam) and Rail Freights Eastward	130
All Rail Freights Eastward	131
European Through Freights, Rail and Steamer	132
Receipts and Shipments by Illinois and Michigan Canal	133, 134
Lake Commerce of Chicago	135
Opening of Navigation at Mackinac for a series of years	135
Receipts and Shipments in 1884	
Arrivals and Clearances in 1884 and previous years	138
Marine Collections in 1884, 1883 and 1882	139
Vessels Built and Documented in Chicago in 1884	140
Vessels Lost in 1884 (Owned in Chicago)	
	140
Vessels owned in Chicago, December, 31, 1884, with their tonnage	
Members of the Board of Trade, December 31, 1884	140-197

OFFICERS

OF THE

BOARD OF TRADE OF THE CITY OF CHICAGO

FOR 1884.

E. NELSON BLAKE, President.

C. L. HUTCHINSON, 1st Vice-President.

CHAS. RANDOLPH, Secretary.

GEO. T. SMITH, 2d Vice-President.

TERM EXPIRING 1887.

W. S. SEAVERNS,

W. H. CROCKER, EDMUND NORTON, W. W. CATLIN.

DIRECTORS:

TERM EXPIRING 1885. J. H. MILNE, G. D. BALDWIN,

S. D. FOSS, T. J. LEFENS. G. D. RUMSEY. TERM EXPIRING 1886. G. H. WHEELER,

C. A. MAIR, L. G. HOLLEY, J. M. BALL, J. J. BRYANT.

A. H. GUNN, Ass't Secretary. Until March 1.

Until March 1. BYRON L. SMITH, Treasurer.

GEO. F. STONE, Secretary. From July 1.

C. BECKWITH, Counsel.

GEO. F. STONE, Ass't Secretary. From March 1 to July 1.

STANDING COMMITTEES:

GENERAL REVIEW.

E. NELSON BLAKE, Esq., President:

Sir,—I have the honor, in compliance with my prescribed duty, to hand you herewith the various statistics and data which represent the business of the year 1884, chiefly with reference to Chicago, but also including such information with regard to our own and foreign countries as seems necessary to an intelligent understanding of our growth and possibilities.

In preparing the Twenty-seventh Annual Report of the Board of Trade of the City of Chicago, one instinctively reverts to the earlier statistical compilations and marks the marvelous rapidity of development, by virtue of which Chicago stands as the foremost grain and provision market of the world.

In the year 1830, her population was 70, increasing in ten years to 4,853, and in the year 1884 numbering more than 675,000, or 136 times as many as in 1840. The populous and thrifty towns which have sprung from her loins, and which gird her borders, sustained by her beneficent activities, are practically a part of her, so that Chicago to-day represents a population which in numbers exceeds the most extravagant predictions of even a generation ago.

The receipts of grain in 1855 aggregated 19,284,723 bushels, and in the year 1884, 137,237,739 bushels; in 1843, one or two horse-power elevators furnished her storage capacity, and into these by exceedingly primitive appliances, grain was dumped regardless of grade, quality, or inspection. Now she is provided with twenty-eight elevators, supplied with the latest mechanical inventions, registering a capacity of over 26,000,000 bushels, carefully inspected under a management, which is a guaranty of safety and accuracy. The largest amount of grain ever stored in Chicago was on the 15th of March last; viz.: 22,833,381 bushels. The immense business in hogs and cattle, which her record exhibits, is nothing less than startling, and entitles her to preeminence as a market for provisions and live stock. In the year 1866 there were received of cattle 393,007; of hogs, 971,746; of sheep, 207,987, and of horses, 1,553. In the year now closing she received of cattle, 1,817,697; sheep, 801,630; hogs, 5,351,967, and of horses, 18,602. Again, her aggregate receipts of stock for nineteen years comprise 18,482,143 cattle; 77,327,257 hogs; 7,340,467 sheep, and 183,665 horses; showing a grand total of 103,333,532 head of live stock, at an estimated valuation of \$2,074,127,503.

Not less significant and remarkable are the varied departments of her industry and enterprise in manufactures, in her trade in dry goods, groceries, iron and steel, boots and shoes, and general merchandise, for the accommodation of which her warehouses and shops adorn our avenues, and to say the least, suffer not by comparison with those of other great cities of the Union.

Any estimate of Chicago regarding her business growth would be inadequate without taking into account the great fire of 1871, which laid her low but for a moment, leaving a mass of ruins, where now are stately public buildings, colossal warehouses, and palatial private dwellings. Thus her courage, energy, and spirit, which constitute her real life and character, were shown to be indestructible.

Her system of railways, stretching on the one hand westward into fertile and immense grain fields, bringing into her lap their varied and well nigh inexhaustible products,

and on the other hand, supplemented by great water ways, feeding both domestic and foreign markets, affords unexampled facilities for trade and commerce, which at once sufficiently account for commercial growth without a parallel, and furnish assurance of a still larger activity and opulence.

The quick appropriation of every means which science has invented to facilitate business, to save labor, to multiply transactions, and to bring to our very doors the markets of the world, not only compliments the sagacity and mental alertness of her merchants, but imparts to this city that intense and increasing vitality which has given Chicago a mercantile character peculiar to itself.

The year 1884 has "dragged its slow length along," and has chronicled a period of business depression and deferred hopes, which have severely taxed the patience and resources of mercantile life in all parts of the world. The hesitation of capital and of enterprise, early in the year culminated in a strict scrutiny of securities and a settled determination to restrain all business within clearly defined boundaries.

Values of both merchandise and securities have been diminished, while profits have been reduced in all departments of industry to an almost indefinable point. In the scale of prices decline has persistently followed decline, and surplus earnings in many instances have stealthily been absorbed. The result has been a prolonged depression in all the chief marts of commerce and a pervading distrust in the elasticity of trade and in the revival of enterprise.

That national financial disaster has been averted, is due to the warning notes of the preceding year, the growing conservatism of controlling mercantile forces, and the prudent sagacity which has signally characterized the general financial management.

A plethora in merchandise, principally in the hands of manufacturers, excessive crops all over the world, and the inevitably distracting influences of a presidential canvass, which was carried on with unusual bitterness and personal animosity, have largely contributed to the unfavorable mercantile record of the year. The upheaval of business in all branches of industry, by the plowshare of angry discussion and intense political partisanship at quadrennial periods, is of doubtful propriety, and suggests the extension of the presidential term to a period of six, instead of four years. The longer term would not only be a direct benefit to the business of the country, but would tend to purity in the discharge of presidential trusts and a familiarity on the part of the executive head with its high functions which would inevitably promote the common weal.

The table of business mortality throughout the country shows an increase of over 12 per cent in the total number of failures for 1884, as against 1883, a gain of 44 per cent in assets and of 37 per cent in liabilities. It is estimated that the assets of the failures in 1884 were 54 per cent of the liabilities, and the number of such failures amounts to 11,620, which is an excess of any previously recorded total, the largest heretofore having been stated as 10,500 in 1878, with \$234,000,000 liabilities.

Speculation has been in the main unprofitable, and in instances where it has been carried on with a disregard of well established conditions, and out of proportion to surplus reserves, it has resulted in disaster. The conspicuous failures have shown that

"Hasty climbers soonest fall,"

and

"That such as are aloft
Mishap doth threaten most of all."

Reckless speculation in Wall street, complicated by the grossest fraud, shook public-confidence for a time to an almost unprecedented extent. The failure of Grant & Ward; and of the Marine Bank, the crippling of the Metropolitan Bank, and the speculation with trust funds which threatened the failure of the Second National Bank (all of New-

York) occurred in May, and hastened the crisis, the effect of which still remains. June witnessed distressing shrinkages in the value of stocks, Union Pacific selling in New York at 29%. These experiences exposed the utter unsoundness of much of the speculating element in Wall street, and wisely induced a very conservative course on the part of the New York banks, to which they have adhered, increasing their surplus of reserve to a point unparalleled in their previous history.

The failure of banking institutions has attracted special attention, but the record is favorable to the national banks, for while national-bank failures have increased only from eight to eleven, the failures of state banks have increased from five to twenty-two, savings banks from two to eleven, and private banks from thirty to seventy-seven. Hence, out of a total of 121 bank failures, occurring the past year, only eleven were those of national banks. It should, however, be observed that of the larger number many were small banks, whose outside and illegitimate operations caused them to succumb to the financial stress.

The national finances have been managed with an intelligence and ability which commend that department to continued and increased confidence. The rapid liquidation of over \$1,264,000,000 of the public debt, since July 1, 1865, the accumulating resources of field, mine, and mechanical industry, a constantly increasing population, and the steady stream of emigration to our shores of energetic and ambitious elements from European civilizations, together with the stability of a government whose citizens peaceably and promptly acquiesce in the will of the majority, all unquestionably contribute to commercial greatness and the absolute soundness of our national credit.

The population of the United States has quadrupled during the last fifty years, and during the same period the surplus exports have increased not only four but thirteen fold; the latter fact is mainly due to the remarkable progress in mechanical inventions as applied to all the leading industries; notwithstanding this enormous growth in our exports, our greatly enlarged domestic requirements are more generously supplied than were the less exacting demands of half a century ago.

The agricultural exports of 1884 amounted to \$536,315,318, and in 1883, \$619,269,449, and have for sixty years constituted from 72 to 82 per cent of the total value of the exports of merchandise from the United States. The stupendous growth of our export and home trade in agriculture may be seen as we consider that in 1830 the value of our exports under this head was only \$48,429,694, and that during the last five years the exports of agricultural products averaged about \$618,000,000 per annum, constituting only about 16 per cent of the total value of the agricultural products of the country. During the last decade the agricultural exports averaged about 78 per cent of total exports, showing a falling off in proportion, though the quantity has increased. This is accounted for by the growth in the exports of manufactured goods, and is a gratifying indication, inasmuch as the enduring prosperity of agriculture is inseparably associated with the extension of manufacturing industry. The prosperity of the American farmer depends upon that of the American producer in other industries. Whatever in any country tends to increase the number of mechanics, miners, artificers, and operatives engaged in productive occupations, contributes to the development of the home market. which is the most important of all markets for the rude products of the soil. Frederick List, in his "National System of Political Economy," says: "When we seek the causes of the prosperity of agriculture, we find the most important to be manufacturing

In 1861, when the bugle note of war summoned from the rural industries from one to two million men, the terrible necessity aroused the inventive and mechanical skill of manufacturers of agricultural implements to such an extent, that not only was the exceptional and patriotic demand met, but there was exported during the four years of

waste and war, a surplus of bread and meat valued at \$520,000,000. Since and now, the prices and movement of breadstuffs and provisions have been, and are, more and controllingly important to the banker in New York, London, Paris, Berlin, and all the capitals of the world. Vantage ground thus gained, mainly under the stimulus of patriotic necessity, must not be lost.

There has been a large increase of stock cattle the year past. The movement of cattle is steadily to the great pasture lands which are so distant from rail communication as to afford cheap subsistence. These immense tracts of land, which reach away from towns and railroads, and lie in richness along the lines of our western water courses, are every year presenting inducements which are embraced by combinations of foreign and American capital. The extent of this movement is hardly realized, and is a powerful agency in the growth of stock cattle. Immense tracts in Wyoming, Montana, Colorado, and New Mexico, occupied by powerful syndicates, are attracting stock of all kinds and ages, so that vast herds are moving thither from the East and from the Pacific coast.

The coin circulation on July 1, 1884, the close of the fiscal year, was \$802,249,799, of which \$250,617,357 was in silver, and \$551,632,442 in gold, showing a net gain of \$14,377,648 in gold, and \$22,401,158 in silver. The exports of specie from the United States ending the fiscal year have amounted to \$67,133,383, as against \$31,820,333 during the preceding year. The excess of exports over the imports has amounted to \$29,707,121, as against an excess of \$3,330,942 in such exports during the preceding fiscal year; an advance in foreign exchange, in February, to the specie shipping points, caused large exports of gold for several months. The continued coinage of silver dollars is considered by the most influential commercial bodies of the country as inimical to our prosperity; this Board has so regarded it, and has advised our senators and representatives in Congress of its views. Any medium of circulation, whose valuation is in the slightest degree merely ostensible, must, in proportion to the volume of its circulation, depreciate the purchasing power and enhance the price of commodities. The money standard of a nation admits of no compromises; the instincts, if not the theories of the people are unerring on these questions, and in spite of arguments and ingenious legislation, false standards are detected and forced to their proper level. Our gold and silver coins should be of equal and interchangeable value, and an international agreement should be arrived at as to the future coinage relation between these An accumulation of silver out of proportion to a circulating demand, precious metals. and beyond and above a judicious amount in the vaults of the public treasury, to sustain the public credit and impart confidence to trade and all productive industries, benefits none but the avaricious mine owner, who seeks in the national government a voracious customer for his wares.

The great interests which give to Chicago her prominence as a bread-stuff, provision, and live-stock market, are so largely national in their character, that I have deemed it advisable to include the foregoing comparisons and discussions in my report.

As we enter upon the new year, there is not a little to warrant us in anticipating a period of substantial rewards in all departments of business; the perilous passage from inflated values, commenced in 1883, is happily completed; the process of liquidation, always painful, is nevertheless salutary, and has been performed with gratifying success. Many elements of doubt and uncertainty have been eliminated, and much financial rubbish has been cleared away. The stern logic of events has solved many problems which menaced our prosperity, and to-day there are more well defined evidences of commercial soundness than have existed for many years. The year, though a trying one, has been, when rightly viewed, a period of real progress. The merchant has a comparatively exact and thorough knowledge of his customer, and buying and selling

bear a judicious and economic relation to financial ability. Intimate experimental acquaintance with individual financial responsibility is one of the chief assurances of the stability and prosperity which happily salute us, as with the lessons of the old, we cross the threshold of the new year.

The desire among the poorly paid laborers and land toilers of Europe to avail themselves of the beneficient provisions of our homestead laws of 1862, and the cheap facilities for acquiring landed property, still stimulate the tide of foreign emigration, which properly receives the fostering care of the Republic. National characteristics are very evident in the flow of emigrants, and show that the people of the Latin are more attached to their mother country than those of the German race. Political and social conditions are intimately connected with the emigration movement, and account for the fluctuations which have occurred since 1873. Foreign emigration to the United States in 1884 was about 85,000 less than in the preceding year. The easy transport to our great agricultural and pasture lands, afforded by our great railway lines, must, under favorable conditions, lead to full streams of emigration. Indeed, the state of public affairs in Europe justifies the expectation that, with the return of good times in this country, we shall witness the resumption of the emigration movement with something of its suspended force. There is much reason to believe that the immigration of later years in the main has been of an improved class, both with regard to former occupations and capacity for new employments.

The business of the exchange, though of course sharing in the general depression, has been quite exempt from any serious embarrassment, demonstrating the sufficiency of the safeguards which inhere in the rules and regulations governing our transactions, and also showing the vigilance with which they have been applied; as a result, our financial health is unimpaired, and Chicago, possessed of every element of commercial and financial vigor and ability, is ready to handle the immense crops of all kinds which, with increasing volume, will this year be poured into her capacious lap.

During the last year there were 3,900 miles of railroads constructed, which in a year of depression cannot be regarded otherwise than as remarkable. The total number of miles of railway in the United States is 124,451. The number of buildings constructed during the year exceeds 4,400, covering a frontage of eighteen and a half miles, aggregating a cost of more than \$20,689,000. The character of these structures, both with regard to stability, architectural beauty, and adaptability, is especially noticeable, and compares favorably with buildings of the same class in other great cities of this or any other country. That such substantial accessions to our building interests, mainly with our own capital, have been made in a year of general depression, must be highly gratifying to every citizen of Chicago, and stimulate his faith in her growing greatness.

What Chicago will become, in the not distant future, with her wealth of industry and intelligence, with her sublime courage, with her keen appreciation of mercantile integrity, with her educational and charitable ambitions, with her indomitable will, with her incomparable geographical position, and with the immense material resources which are not only within her own borders, but which in limitless supply lie around and beyond her, stretching into the states and territories, the development of which is yet in its infancy, I shall not attempt even to outline, much less to portray.

The new Board of Trade building, commenced on December 13, 1882, is nearly completed, and will, in all probability, be ready for occupancy on the 1st of May next. The report of the Board of Real Estate Managers will be found herewith, and at the appropriate time and place a full description and account will be submitted by the Honorable Chairman of the Board of Managers, who will announce the consummation of an enterprise creditable to those who called it into being, and who have with great ability and fidelity superintended its construction. In design, material, and in elegant adaptation

to the requirements of our trade, it meets the highest expectation. For many generations may it stand a source of pride to Chicago and the Northwest.

The United States official agricultural statistical returns for the past year show that 69,683,780 acres produced 1,795,528,432 bushels of corn; 39,475,885 acres, 512,763,900 bushels of wheat, and 21,300,917 acres, 583,628,000 bushels of oats; moreover, oxen and other cattle number 29,046,101; sheep, 50,626,626; swine, 44,200,893, and milch cows, 13,501,206. All portions of our land have responded to the remarkably favorable climatic influences of the seasons, and not only has the yield been liberal, but the quality of grain and stock excellent. "The pastures are clothed with flocks, the valleys also are covered over with corn."

The state of Illinois, with its wealth of soil, stimulated by the intelligent industry of her people, produced 33,558,663 bushels of winter wheat, and 808,830 bushels of spring wheat, 207,556,662 bushels of corn, and 105,314,958 bushels of oats, exhibiting an increase over the crop of the previous year of 13,826,261 bushels in winter wheat, and 200,000 bushels in spring wheat, 20,973,104 bushels in corn, representing a total valuation of \$113,051,141; the value of the crops of rye and barley may be stated as nearly three million dollars. Here is a state without a dollar of indebtedness, presenting in a single year of low prices a valuation in wheat, corn, oats, rye, and barley alone, amounting to more than \$116,000,000. The same is relatively true of all the magnificent states and territories which find in Chicago their chief market, wherein not only to sell their great staples, but to purchase their supply of manufactured goods of all kinds. Such resources must impart confidence to merchant and banker in looking forward to the business of 1885, and likewise assure the capitalist and investor that his securities here are not only unimpaired, but constantly improving in value.

The exportation of provisions has rapidly increased during the last twenty-four years; the value of such exports increased from \$16,934,363 during the year ended June 30, 1860, to \$156,823,616 for the year ended June 30, 1881, falling to \$114,416,547 for the present fiscal year. It appears that the value of the exports of pork products, comprising bacon, hams, lard, and pork, in the year 1884 amounted to \$69,753,513, and constituted 61 per cent of the total export of provisions. The total value of the exports of hog products in 1860 was \$9,951,912, reaching, in 1881, to \$104,660,065. The domestic consumption may be realized as we consider that our exports are but 21 per cent of the entire hog product of the United States. The returns and comparisons of recent years indicate that 93 per cent of the total quantity of hog product exported from the United States consisted of the surplus hog products of the following states arranged in the order of the number of hogs raised in each state, viz.: Iowa, Illinois, Ohio, Missouri, Indiana, Kansas, Nebraska, Wisconsin, Tennessee, and Kentucky.

The governmental decrees of Germany and France interdicting the importation of our hog products, still menace this important and truly beneficient industry. Germany, even, prohibits the transportation of hog product across her territory. Both the French and German people are fully convinced of the absolutely false and untenable ground upon which such prohibition is based, and the attitudes of those governments on this subject is fast becoming an insult, not alone to the intelligence of the United States, but to the laborers and artisans of France and Germany, who are thus being deprived of a wholesome article of food at a moderate cost.

"If," says the British Chamber of Commerce, "the trade were untrammeled, this food, which, according to the highest authorities, namely, the Committee of Hygiene, and the Academy of Medicine, is perfectly wholesome, provided it be sufficiently cooked, could be retailed to the humble customer at from 6d. to 7d. per pound; as it is, however, he is driven to pay the extraordinary prices current in France for other flesh meat." Were proof needed to show that the opinion quoted is reliable, such proof, sufficient and con-

clusive, is afforded in the fact that Great Britain imported from the United States, in 1882, more than 444,000,000 pounds of salted provisions, from the consumption of which no disease manifested itself. The evidence, whether we regard its source or its volume, its practical or its scientific character, makes it a work of supererogation to further discuss this branch of the subject. There is no good reason why American hog product is not as wholesome, nutritious, and desirable to the German in Germany, as it confessedly is to the German in America. If it is, as it appears to be, a policy of those governments to tax American pork to encourage home production, and to enable the German and French farmer to obtain extreme prices for their food products from their own population, they should have the dignity and honesty to retract their unwarrantable pretext and put forward the honest reason for their attitude. A persistence in their present policy, and their adherence to declarations involving an outrage against American commerce, should be followed by retaliatory acts on the part of this government, and the importation of German and French wines, much of which is adulterated with substances injurious to health, should be prohibited. Such retaliatory acts would have a greater effect than a budget of protests lodged in Berlin. In a review of this subject by the prominent journals of France, the conclusion is clearly arrived at that the French decree is in the interest of the packers of Nantes and other places, and that it is working serious injury to the business of the country, as well as to the laboring populations, who are thus deprived of a cheap and desirable article of food. M. Jules Ferry, and other distinguished statesmen, stamp the decree as unjust and unwarrantable, and would gladly see it abolished. The Bordeaux Chamber of Commerce, after exposing the insincerity of the alleged reason for the importation of our hog product, says, in a memorial to the Minister of Commerce: "For France, the question to consider is simply whether she shall import forty million kilos of American salt meats, the wholesomeness of which is testified to by all competent authorities, and whose consumption is really necessary to our laboring classes, or the closing to our commerce and industry of markets otherwise open to them in North America with its growing population."

While we are convinced of the soundness and healthfulness of the American hog product, it would, perhaps, be wise to have a compulsory governmental inspection of our bacon, hams, and pork intended for shipment to foreign countries, thus removing every obstacle at our command in the way of an unhindered exportation of those articles. There is nothing to fear from an inspection which shall include the entire product, especially since there is probably no article of food received under a more minute inspection, or handled, cut, or packed with a more thorough regard for cleanliness and nicety than is pork. There are no industrial departments which are more rigidly and systematically governed than are the great packing houses of Chicago. Every possible arrangement is made which experience and an intimate knowledge of the trade demand, and no narrow-minded policy is allowed to interfere with cleanliness, accuracy, and despatch. The packer takes pride in his brand, and aims to give it a permanently and deservedly successful place in both home and foreign markets. The growth of the trade at home and abroad is a gratifying comment upon his endeavors. The sound American hog will prevail over and survive unsound governmental decrees.

India as a wheat-exporting country is attracting special attention not only in view of the increase in her wheat exports, but also in consideration of railway extension to her fields of production by British capital, and the proposed introduction among her farmers of improved agricultural implements.

The area under wheat in British India is estimated at 20,000,000 acres, yielding between 5,500,000 and 6,000,000 tons, and in native territory 6,000,000 acres, yielding about 1,250,000 tons. Of this 6,750,000 tons, or 225,000,000 bushels, the quantity available for export to Europe is a matter of conjecture. In 1881 her exports amounted to 14,000,000

bushels, in 1882 37,000,000, and in 1883 26,400,000. The amount exported in 1883 indicates that the exports of 1882 were abnormal. They are accounted for by the deficiency in our crops of 1881, speculation in our own markets, and the more or less deficient harvest of the continent, all of which contributed to bring Indian wheat into unprecedented supply in Europe. While there are many hypotheses necessary in the process of arriving at Indian agricultural statistics, it is ascertained as a result of a series of experiments and investigations that wheat in India could be produced with hired labor, under good supervision, at about 12s. a quarter (about 36½ cents) per imperial bushel. At points of shipment within 300 miles of Calcutta the cost is somewhat less, with an average yield of 11% bushels per acre. The yield varies in different provinces from 7 to 13 bushels per acre. The highest provincial average is assigned to the northwest provinces, which produce about 80,000,000 bushels. Most of the land in these provinces is of average good quality, is manured and irrigated, yielding on an average 13 bushels per acre. The future of India as a wheat-exporting country depends upon so many circumstances, and includes such a variety of data, such as climate, cultivators' tenures, quality of wheat, incentives to improvement of the land, by the native population, improvements of roads and the construction of railways, that anything like a thorough discussion of the subject in this review is impracticable. A country that has an area about half as great and a population more than four times as great as our own, and that has been occupied for thousands of years, and a climate that does not induce European immigration, will not with any rapidity emerge from a listless and unambitious existence into active commercial competition with other wheat-producing coun-The present railway facilities of India may be realized as we consider that only 10.970 miles are open for traffic, the smallness of which will be appreciated when it is contrasted with the 124,451 miles in operation in this country.

It is undeniable that railway extension would carry with it a better condition of livelihood, a multiplication as well as a supply of wants, and a dissatisfaction with primitive and rude surroundings, so that a much larger proportionate amount of wheat would be used for home consumption and distribution than is at present. It is not probable that any sudden or rapid progress in the exports of wheat from India will take place. Her population is increasing with great rapidity, and is not possessed of those elements which belong to enterprise and an easy adaptation to a new order of things. The low prices which prevailed the past year have discouraged Indian exporters, and shown that unless prices are fairly remunerative the wheat production would not be extended, but products would be cultivated which would not suffer from the effects of American competition.

COTTON.

The crop of 1884-5 will turn out about 5,700,000 bales, which will not materially vary from the crop of the previous season. There has been a wide prevalence of rust, and the shedding of leaves and young bolls, the effect of severe meteorological changes. The damage inflicted by the caterpillar has been slight, owing to the prompt application of poison. The boll worm has been more than usually abundant. We produce nearly two-thirds of all the Cotton grown in the world, and consume one-third, and ere long shall manufacture one-half. The growth of the Cotton industries of the United States is illustrated by the fact that the number of yards of cotton cloth produced, increased from 1,148,252,406 yards in 1860, to 2,273,278,025 yards in 1880. The average annual value of the exports of Cotton from the United States during the last five years, amounted to \$12,322,428, and it is estimated that this amount constituted only from five to six per cent of the total value of manufactures of Cotton in the United States during that period. The following is the order of states, according to the amount of produc-

tion in each state: Texas, Mississippi, Georgia, Alabama, Arkansas, South Carolina, Louisiana, North Carolina, Tennessee, Florida.

The quantity of grain handled in Chicago this year is somewhat less than in the year immediately preceding. The shrinkage is accounted for chiefly by the falling off in the receipts of corn. The increase has been in wheat and oats, and the decrease in corn, rye, and barley; resulting in a net diminution of 5,363,257 bushels, reducing flour to wheat. The quantity of flour and grain in store (the former reduced to its equivalent in wheat), on January 5, 1834, was 18,827,887 bushels, as against 10,781,990 bushels on the corresponding date of the year 1883.

FLOUR.

The Flour trade has been quite a satisfactory one during the entire year, both the local and shipping demand presenting evidences of substantial growth. The output of the Chicago mills shows an increase of 241,121 barrels over that of the preceding year. The exports have been 7,512,177 barrels. American-made Flour is in marked favor in European markets, and British millers are unable yet to compete with our manufacturers, notwithstanding the large variety of wheat from which they have to make their selections. The receipts for 1884 are 4,960,830 barrels, which amount to 665,315 more than in 1883; the total quantity handled in this market being 906,436 barrels more than in the previous year. There is a growing disposition to consign Flour to this market rather than ship to distant points and be subject to delays and expenses incident thereto.

While the prices have in the main followed the values of wheat, there were periods of a strong market when the prices of wheat were soft and weak, notably during the first part of the year, owing to the scarcity of the old crop. Immediately after the moving of the new crop prices declined perceptibly, and thereafter during the remainder of the year sales were made only by continued concessions. The receivers wisely and courageously accepted the situation, met the market and the inevitable, and saved their country shippers from greater loss in the direction of storage, insurance, and interest. There has been a gain in the export trade with Europe, and also with Canada, which is a feature of this trade uniformly gaining in deserved prominence. Bags are more generally used than before, and are more satisfactory to miller and purchaser than barrels, especially in relation to export trade. The trade in winter wheat has largely increased, owing to the general and successful introduction of the latest milling improvements into our winter wheat mills, to which they were thought not specially adapted. The Flour trade in this market, both with regard to its domestic and foreign aspects, is an important one, and promises more activity, and a larger one in volume. than for many years.

WHEAT.

The average farm price is 65 cents per bushel, against 91 cents a year ago. The average price in Illinois is 67 cents; in Nebraska, 42; Kansas, 45; Minnesota, 55. The low price of Wheat is simply what might have been expected, and resulted from a series of crop failures in Europe which greatly stimulated production all over the world. The breadth sown is greater by nearly 3,000,000 acres than in 1883. The low prices which prevailed the past year will soon reduce the area and relieve over production.

The Wheat market has ruled dull and decidedly uninteresting throughout the year; its course has been disappointing to the general trade, and as the year wore on, many withdrew from active trading with a feeling akin to disgust at its unconformity to any of its previous characteristics; it has been doggedly heavy, and has in its course upset many theories which were thought to be impregnable; a deceiving market from the very beginning of the year, it has left at its close many baffled operators "reconnoitering for position."

Receipts came crowding in regardless of value, affording no opportunity for anything like a well founded advance, apparently ambitious only in the direction of increasing the "visible supply," and quite indifferent to net prices; it was clearly evident that such a continuous stream of arrivals in the face of a discouraging market was impelled by nothing less than a dire necessity, and indicated the desire to realize incident to the process of compulsory liquidation.

The receipts of all grades up to July 1 amounted to 4,310,916 bushels, a very large proportion of which inspected No. 2 Spring; from the 1st of August the receipts rapidly multiplied, aggregating for the year 26,397,587 bushels, or an excess of 6,033,432 bushels over those of 1883. The shipments amounted to 21,046,577 bushels, which were 9,317,823 in excess of the previous year.

The quantity exported for the year was 58,404,978, which exceeded the Wheat exports of 1883 by 7,183,880 bushels. The average price of No. 2 Spring for the year in this market is 83¾ per bushel; the lowest price was touched in December, viz.: 69½; the highest was reached in February, viz.: 96. Red Winter ranged from 72 to 1.06½ per bushel. England records the lowest price for more than one hundred years.

The quality has been uniformly good, and the supply of the lower grades may be accounted for this year, more by careful inspection which obtains in this market, than by any pronounced inferiority in the wheat itself. The discriminating character of our sample buying and selling does not prevent any injustice to the intrinsic merits of the grain; it brings the price which its actual merits deserve, and if it is in any given case slightly dirty, or too much mixed with oats or other grain to inspect No. 2, it is sold by sample at only a slight reduction from No. 2 price, instead of being put into store and sold under the grade of No. 3, regardless of its actual value.

Quantity in store December 27, 13,254,906.

The following shows the lowest and highest prices for No. 2 Spring Wheat in the Chicago market for the past twenty-five years, and the months in which extreme prices were reached:

Years.	Months the Lowest Prices were Reached.	Yearly Range.	Months the Highest Prices were Reached.
1860	December June and July January August March December February August November December April August November	.66 @1.13 .55 @1.25 .64 @ .92½ .80 @1.15 1.07 @2.26 .85 @1.55 .78 @2.03 1.55 @2.85 1.04½@2.20 .76½@1.47 .73¼@1.31½ .99½@1.32 1.01 @1.61	April. May. August. October. June. January. November. May. July. August. July. Feb., April, and Sept. August.
1873 1874 1875	September October February	$.89 @1 46 $ $.81\frac{1}{2}@1.28$ $.83\frac{1}{4}@1.30\frac{1}{2}$	July. April. August.
1876		$.83 \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \$	May. April. December.
1880	January December	$\begin{array}{cccccccccccccccccccccccccccccccccccc$	January. October. April and May. June. February.

The Wheat crop exceeds that of 1883, by about 100,000,000 bushels. The yield is 13½ bushels to the acre, and the quality generally good, especially in the middle states on the western slopes of the Alleghanies, and in Michigan, Wisconsin, and Minnesota.

RYE.

The receipts of Rye for the year amount to 3,327,516 bushels, which is a reduction of over 2,000,000 bushels from those of the year 1883. The average price for the year in this market is 57.4 cents per bushel. The general yield was about twelve bushels to the acre, and the quality superior. Total number of cars inspected, 5,927. Prices ranged from 49½ (which was touched on November 1) to 65½, which was reached on June 18. The volume of business was restricted by comparatively light receipts, the situation of the market admitting of little opportunity for speculation. Early in the year there was a good foreign demand, caused by a shortage in Germany and France, aided by low ocean rates of freight. The first car of the new crop arrived July 14, and was sold at 61 cents per bushel.

CORN.

As was anticipated, the movement of Corn for the year has been materially less than in 1883, which was a year of large receipts, owing to the exceptionally large crop of 1882. The crop of 1883 was short, and our receipts for the last year were fully up to reasonable expectations, and comprised 59,580,445 bushels, as against 74,412,319 bushels in 1883. There has been a wide range in prices, viz.: from 34½ to 87. In the month of September a very successful and thoroughly organized control of the market was perfected, and every pulsation of prices was in absolute control by master hands. Prices went up or down in obedience to orders, and instant compliance with the wish of the successful operators was the rule. So completely masters of the situation were the managing brokers that they would bid 90 and 95 and even more, with no Corn to be sold; the key to the situation they held, and the deal was fortified by consummate plans in all the chief grain markets of the country; it brought every kernel to the market, and swept out the bins in every direction. There has been a steady trade in sample Corn, and the distribution of car loads, selected with reference to different sections of the country, has been uniformly liberal. The average price of No. 2 for the year is 51.7. The export movement has been about the same as last year. There is no grain so difficult to inspect as Corn; the inspection department have with good judgment passed upon the quality and condition of our receipts. There is more or less of every crop, which must grade as rejected or No. 4, and yet which is of very good quality, i.e., good for immediate use and shipment, but not sufficiently dry to inspect No. 2, and be put in elevators where it is liable to be carried many months. Our store and contract must be dry, and thoroughly adjusted to heat and cold. This is important, and sustains the high reputation which our Corn enjoys with foreign buyers. This strictness in inspection works no harm to the consignor, as under the able and experienced management of our receivers, rejected or No. 4 is sold by sample on its merits and at full value; indeed, the facilities in this market are such with regard to selling grain by sample, that should prices favor early shipments, consignors and country dealers may send their Corn to market without waiting until it is thoroughly dry, confident of sales based upon its intrinsic merits. Corn not inspecting No. 2 is not sold under the grade in any arbitrary sense, but disposed of by sample, according to its true condition, color, and soundness.

The crop of 1884 is a magnificent one in quantity and quality, aggregating 1,795,528,432 bushels, grown on 68,301,889 acres, and is the largest crop ever grown in quantity, though not the largest in rate of yield. The average farm price is 36½ cents per bushel; it has been lower but twice in ten years, in 1877 and 1878, after two previous years of abundance. Iowa, Illinois, Missouri, Kansas, and Nebraska lead the van of this immense out-turn, the valuation of which is in the vicinity of \$645,000,000.

The condition is higher than for past five years, but not so high as in any of the remarkable Corn years from 1875 to 1879 inclusive.

The following shows the lowest and highest prices for No. 2 Corn in the Chicago market for the past twenty-five years, and the months in which extreme prices were reached:

Years.	Months the Lowest Prices were reached.	Range for the entire Year.	Months the Highest Prices were reached.
1860	December Sept. and Oct. April January March December January December Jeronary Jecember Jecember December	.22 @ .41 .42 @ .98 .76 @1.40 .38 @ .88 .33¾@1.00 .56¾@1.12 .52 @1 02½ .44 @ .97½ .45 @ .94½ .39½@ .56½ .29½@ .48% .27 @ .54½ .49 @ .86	April. OATS.

The crop is the largest ever grown in this country, the area being greater by a million acres. The product, as elsewhere stated, is 583,628,000 bushels, showing a yield per acre, as estimated, of 27.4 bushels. The average farm price is 27.7 cents, a reduction of 5.3 cents from the price of the previous crop.

Illinois shows the largest production of any state, viz.: 105,314,958 bushels; Iowa next, Wisconsin next.

There have been large crops, with but insignificant variation in average rate of yield, for four years. No failure of the crop has occurred since 1874, and since that date every crop has been a full one, except that of 1879. The wet and chilly springs unfavorable to corn planting and early germination are adapted to this crop.

Receipts for the year, 40,082,362, which are 3,580,079 bushels more than in 1883. Prices have ranged from 23 to $34\frac{1}{4}$ cents.

An extensive sample trade is done in this cereal, and here not only are the buyers' wants met, with regard to special grades, but the consignor is enabled to find a market based upon the actual worth of his grain. The speculative trade has been very satisfactory, and, though not as heavy as in corn and wheat, it is in many respects an attractive deal; the fluctuations are not liable to be great, yet are sufficiently frequent to invite a very fair business.

The following shows the lowest and highest prices for the past 25 years, and the months in which the extreme prices were reached:

Year.	Months Lowest Prices were Reached.	Range for the Entire Year.	Months Highest Price were Reached.
360	November	.16 @.38	January.

BARLEY.

The receipts of Barley aggregate 7,849,829, against 8,831,899 of the year 1883. The shipments were 4,095,500, as against 4,643,011. A large proportion of this grain is sold by sample to our local maltsters, and a close discrimination on the part of both buyer and seller, results in sales which bear a very close relation to the actual merits of the property. No. 2 Barley (the speculative grade) brought from 53 to 75½ cents per bushel, the highest prices prevailing in April, and the lowest during the closing month of the year. In the early part of July the first car of new Barley arrived, and sold at 62 cents per bushel. The yield of the crop averaged twenty-three bushels to the acre, and the product exceeded 5,000,000 bushels of average quality. Probably there is no grain more skillfully or critically handled than is Barley, yet, in spite of this, more or less of chemicaled Barley was imposed upon buyers. The late rains stained and damaged quite a large proportion of the new crop, which caused a substantial premium to be paid for bright, clean, and healthy samples over those which were dingy and sickly. Of 10,632 car loads which arrived during the year, but 1,814 car loads inspected No. 2, resulting in extensive sales by sample, as previously noted.

LIVE STOCK AND PROVISION TRADE.

The business in Live Stock has grown to immense proportions, and involves so many interests and industries that nothing less than a studious attention to the subject can convey any adequate impression of its wide-reaching extent. The total receipts for the year amount to 8,042,249 head, shipped in 185,683 cars, averaging 670,187 head per month, or nearly 22,349 per day. This vast procession moving into a single market, to be handled in the multiform manner which the wants of the trade and the condition of the markets demand, sets in motion a system of business activity which is nothing less than wonderful, and reveals to a thoughtful mind the agricultural resources of the West, and the gigantic facilities which are at work for their development. The receipts of Cattle varied but little from those of the preceding year. Through the courtesy of the efficient Secretary of the Stock Yards, Mr. Geo. T. Williams, the following comprehensive statement is furnished, showing the receipts of Live Stock for several years:

Years.	Cattle and Calves,	Hogs,	Sheep,	Horses,	Aggregate
	Number.	Number.	Number.	Number.	Value.
1834	1,817,697	5,351,967	801,630	18,602	\$187,387,680
	1,909,167	5,640,625	749,917	15,255	201,252,772
	1,607,495	5,817,504	628,887	13,856	196,607,221
	1,547,498	6,474,844	493,624	12,909	183,007,710
	1,382,477	7,059,355	335,810	10,398	143,057,626
	1,215,732	6,448,330	325,119	10,473	114,795,834

Notwithstanding the slight diminution in the receipts, they were in excess of any year prior to 1883. In the month of March the arrivals were the smallest, and in the month of October the largest of the year. The quality has been inferior to that of former seasons, but improved during the latter part of the year. Owing to the necessity of marketing steers at an early age, the average weight of Cattle was exceptionally light. This, however, proved no disadvantage to either seller or consumer. Prices have ruled quite steady, more especially for the better grades, indicating that purchases were confined to actual wants. The closing prices of the year are about the same as at the opening, viz.: \$6.05 per one hundred pounds for choice stock, affording a fair profit to the stock raiser.

The growth in the Fresh Beef trade is steadily advancing, attributable to improving and special facilities existing in this department, as well as in the mode of transportation, affording to the smaller markets a superior article at a less cost than the former methods permitted; hence our shipments of Beef on the hoof are relatively smaller than are our receipts, for while the receipts were 61,247 less, the shipments were 174,874 less than during 1883. The number of Cattle slaughtered for the dressed-beef, packing, and canning trade aggregates 1,188,154, showing an increase of 159,503 over the number killed for this trade in 1883. Early in the year more or less disturbance, and almost stagnation, in the market, was produced by the reported outbreak of the foot-and-mouth disease, and for a while seriously threatened our export business. Subsequently our foreign customers were convinced that the reports were without proper foundation, and in May, active and normal markets were revived, bringing about an active demand during the latter part of the year.

The prices of Live Hogs have ruled comparatively high throughout the year, caused by reduced receipts and some increase in shipments. Packing, and city consumption exhibit a material falling off. Prices have ranged from \$4 to \$7.75, including light Bacon and shipper's heavy Hogs, and during the early part of the year were well maintained, reaching the highest point in the latter part of February and early in March, closing at \$1.75 per one hundred pounds less than the opening prices of the year. The rapid increase in receipts during the last three months, together with the gain in average weight, is significant as showing that the West simply needs a good general corn crop to maintain a good volume of shipments. The average weight of Hogs for the year is 240 pounds. The December average was something more than 270 pounds.

The receipts of Sheep for the year were the largest ever recorded, viz.: 801,630. Owing to the rapid development of Sheep husbandry, prices have been far from satisfactory, and in some portions of the year almost discouraging, the market closing in December at \$3 to \$4.15 for good to choice styles.

The inferior corn crop of 1883 had a marked effect upon the course of the market with respect to the Pork Packing business of the year. The number of Hogs packed in this city amounts to 3,911,792 as against 4,222,780 during the preceding year, which bears nearly the same relation to the receipts as the packing of 1883 bears to the receipts of that year. Intense speculation during the major part of the year produced many irreg-

ularities, and threw prices out of their normal condition; oftentimes changes in prices were so violent as to result in a panicky condition of the market, and many operators were driven to draw upon surplus profits. The situation offered irresistible inducements to holders of the product to demand advanced prices and take the reins into their own hands. As a consequence, August Pork sold at \$27 per barrel, and Short Ribs at \$11 per one hundred pounds, in settlement with unfortunate short sellers. The cash Pork repacked, was quoted at the same time at \$18.50. From August 30 prices rapidly declined, and on December 26 Pork sold at \$10.75, and Short Ribs at \$6. There is a growing tendency on the part of foreign buyers to send their orders direct to packers here, who have become familiar with the peculiarities of the wants of foreign markets with regard to shape of cuts, appearance, packing, etc. Our packers have studied to the minutest detail the wants and idiosyncrasies of the various foreign markets, and have so successfully conformed to them, that direct trade with European markets is increasing, and the foreign distributor of meats is brought into close and intimate relations with the American packer.

The following statement shows the export movement of Beef and Hog Product, in pounds, for a period of three years:

Years.	Fresh Beef.	Salted Beef.	Pork.	Bacon and Hams.	Lard.
1884	119,093,577	41,398,165	50,564,869	359,651,932	225,950,705
	116,928,727	46,443,037	67,759,872	423,874,985	277,034,680
	53,983,730	40,517,648	66,029,915	345,862,163	235,536,658

OTHER FARM PRODUCTS.

Chicago as a Seed market is every year gaining in prominence, not alone because of the increase in the volume of trade, but chiefly owing to the ability and integrity with which orders are filled by her representative merchants in this line of business. The receipts of Flax Seed for the year were about 600,000 bushels more than those of 1883, and prices have marked a range of 32½ cents per bushel. The cultivation of Flax Seed has increased fully 300 per cent in five years. The crop of 1884 is estimated at nearly 9,000,000 bushels as against 7,250,000 for 1883. The acreage under Flax in 1882 was 79,547, and 109,335 in 1884. Prices have ruled higher than in 1883 for Flax, and lower for Clover and Timothy Seed. The trade in Timothy Seed has been quite large, and dealers have done a satisfactory business. There was no speculative feature to this trade, and at times the market was exceedingly dull. Clover Seed has been very quiet; likewise Hungarian and Millet. The animation of the Seed market was almost monopolized by the transactions in Flax Seed.

The receipts of Butter were liberal, exhibiting a substantial increase over those of 1883. The exports also were very large, showing an increase in value of \$1,500,000 for the fiscal year over that of 1883. The business in Cheese has been satisfactory, both with regard to the volume of trade and the quality of the receipts. The exports for the year ended June 30 were about 13,600,000 pounds in excess of those of 1883.

The volume of the trade in general produce has been larger than during the year 1883, and although prices have been lower, the result cannot be termed unsatisfactory. There is a very marked tendency to improve the quality of the dairy product, and command the choice trade of the country. The entire movement of country produce is conducted with an approved system and an intelligent understanding of the stocks on hand and the character of the demand. The business on South Water street, with its great variety of produce from the farm, comprising fruits, fowls, vegetables, eggs, dairy product, etc., aggregates, it is estimated, upon an average, \$1,000,000 per week.

xxvi

LUMBER, COAL, AND SALT.

Owing to a large overproduction of Logs during the winter of 1883–4, and in sympathy with the general business depression of the country, the lumber business of Chicago and the Northwest was transacted on a margin of about ten per cent below that of the previous year. The reported receipts of forest product at Chicago for the year ending December 31, 1884, was 1,822,315,000 feet of Lumber, 919,706,000 Shingles, 73,077,000 Lath; Posts, 3,087,376; Railroad Ties, 947,938; Telegraph Poles, 116,034; Wood, cords, 64,825; Bark, cords, 20,385; Slab, cords, 43,632; Piles, 517; Spars, 12. In addition, of the coarser products, a considerable quantity was received by rail, of which no data is at hand. The estimated value of forest products handled in Chicago during 1884 is about \$40,000,000.

The total cut of pine lumber by the mills of the Northwest in 1884 was 8,070,533,954 feet, against 7,624,789,786 in 1883. The total output of shingles for 1884 was 4,543,826,000, against 3,964,756,639 for 1883.

Our receipts of Coal for the year were 3,842,796 tons, against 3,789,108 tons for 1883, The prices of the better qualities have varied but little from those of the year immediately preceding, and the general character of the trade is unchanged.

Prices of Salt have ruled lower than in 1883—about 15c. per barrel on American, and from 12 to 22c. per sack on Liverpool fine. There has been a substantial increase in the consumption of Liverpool salt.

DIRECT EUROPEAN SHIPMENTS.

The aggregate quantity of direct shipments to Europe during the year was somewhat in excess of the average amount for the last three years, but 52,869 tons less than was shipped in 1883. The decrease has been in part of Seeds, Flour, Cheese and Oil Cake. There were about 300,000 bushels more of Wheat and 1,000,000 pounds more of Butter exported than during the preceding year.

VISIBLE SUPPLY.

The plan of compiling a "visible supply" statement in Chicago was carried into effect on the 9th of February last, and represents the visible stocks of Grain in the United States (excepting California) and Canada. It is based in every instance upon official returns of stocks in the chief grain centers, and also official statements of shipments from the leading primary markets. The plan of compilation is not at any time varied from. That there are sometimes disturbing conditions and exceptional circumstances affecting in transit grain, is quite apparent; but Chicago has not thought it wise or safe to deviate from a well understood plan, or make any arbitrary or individual interpretation of such disturbing conditions or exceptional circumstances. We consider the better plan to furnish in all cases authoritative statements and official figures, and not to speculate upon any conditions, real or imaginary, with reference to any special phases of the in transit movement. The public want an official statement, as far as such a statement can be procured, and prefer to make their own deductions of any unusual conditions affecting the transportation of grain, not desiring of any official his private or arbitrary conclusions. The fact is, an intelligent and sagacious reading of the "visible supply" takes into account any and all extraordinary surroundings, and makes such an interpretation as experience and good judgment suggest. Such interpretations may vary somewhat, but among experienced merchants will substantially agree.

It is clearly not within the province of a statistician to deal in generalities, or to submit, in variation from a well understood and accepted plan, any exceptional conclusions. It belongs to others to apply his authenticated figures to blockades, interrup-

tions, riots, or local disturbances, and, assisted by official figures as an immovable basis, to buy, sell, or let alone.

Chicago and the West prefer to do their own thinking and reasoning, at least upon such matters.

TRANSPORTATION.

While changes in rates of transportation have not been attended with great surprises or violent changes to the serious detriment of the shipping interests, there has been by no means a strict adherence to the published tariffs; indeed, rates of freight have been vacillating and disturbing, so much so, as to impart a general distrust in published rates. Whatever may be the circumstances, exceptional or otherwise, which result in the unreliability of tariff rates, it is unfortunate that official announcements should be made in which the public have no confidence. Competition for east-bound freight, by lines whose main direction is north and south, and the general prostration of business, have been chiefly instrumental in bringing about the variations in freight rates. managers of trunk lines have already addressed themselves to the task of concerted action in view of this new complication, and an early adjustment of existing difficulties I am happy to be informed that our railway representatives, aware of the confusing, harassing, and ultimately unprofitable results which inevitably attend a policy of surprises and bad faith, are fully alive to the desirability of sustaining uniform rates. Could this be accomplished, much would be done toward avoiding spasmodic movements in the volume of the carrying trade, and resulting fluctuations in prices, which are to a greater or less extent misleading.

The practice, however limited, by which merchandise is specified in bills of lading, as "sundries," or as a different kind from that which is actually shipped, in order to come within a reduced rate of freight, or to conceal the movement of any commodity, is not only highly reprehensible, but mischievous, resulting in a distortion of statistics, which, besides being misleading, is exceedingly annoying, and should be strictly forbidden.

Violent actions and reactions in trade are always undesirable, and in many instances are plainly attributable to rates of freight which have no defined or reliable status; demoralization, produced by an unequal application of freight rates, has invited discussion and legislation with regard to railway management, and the subject of inter-state commerce is earnestly engaging Congressional and general attention.

The solution of railway problems in England has been arrived at by the establishment of a commission, and it is not unlikely that in a similar way, we in this country may seek to harmonize and regulate the seemingly conflicting interests touching the subject of inter-state commerce. That very much intemperate and ill-considered discussion has taken place on this subject is apparent, and while interests and sections have undoubtedly suffered by freight discriminations, the railroads have been forced, in some instances by an unscrupulous competition, to do business upon losing terms. A commission of high-minded and competent men, wielding the strong arm of national authority to prevent a reckless competition for traffic, and to adjust the interests of commerce with those of railways, would be of undoubted service to all concerned. There is no feature of commercial growth more vital than that of transportation, for upon the plane of remuneration to the farm laborer, whose civilized requirements cannot wisely be curtailed, we must not compete for foreign trade. Our chief recourse to secure this trade must be cheap transportation, applicable to all parts of the route leading from the farmer to the consumer, and not unduly urged from the market to the coast, to the exclusion from such benefits along the line from the farm to the city or market. Any reduction in the rates of carriage along the great ways of transport should

apply equally to all portions of the route, and no part should escape from any advance in rates which the general welfare might require. There is ample field for competition in the buying and selling of merchandise, but the great lines of communication, and of transport, should extend their benefits to all with an absolute equality, and by a sacred observance of tariff rates.

Both lake and canal rates have ruled lower than for many seasons. In the month of August the average rate by lake for wheat was 4.2 cents per bushel from Chicago to Buffalo, and for corn 3.8 cents; for the same month by canal from Buffalo to New York, 1.94 cents for wheat, and 1.69 for corn. Below is a table showing the average rate by lake from Chicago to Buffalo on wheat and corn, and also the average rate on the same articles from Buffalo to New York by canal, in the years named:

	CANAL.		LAKE.	
	Wheat, Cents.	Corn, Cents.	Wheat, Cents.	Corn, Cents
884 883 882 881 880 879 877 876 877 876 877 876 877	1.94 3.6 2.3 3.1 5.6 4.9 3.2 4.0 2.3 2.5 3.1 6.5	1.69 3.7 2.1 2.8 5.1 4.5 3.0 3.6 1.8 2.2 2.1 5.6 8.8	4.2 4.6 5.4 4.1 5.9 6.5 5.2 7.0 5.8 8.1 9.0 10.6	3.8 4.3 4.9 3.6 5.4 5.9 4.6 6.4 5.3 7.3 8.0 9.6
71	$\begin{array}{c} 6.2 \\ 5.0 \end{array}$	5.7 4.7	11.8 9.4	$\substack{10.8\\9.2}$

The immense tonnage of coal west-bound made it possible for vessels to carry grain at these remarkably low rates; thus reciprocal commercial relations, induced by reciprocal wants, contribute to general development and the common good.

The wise and patriotic policy of the state of New York in abolishing all tolls on the Erie Canal is most fully demonstrated, even in view of her own business prosperity and internal interests.

The table of foreign rates may be found in its appropriate place. The rates have been fairly steady, but with a tendency to a slight reduction.

The Receivers' Association is an efficient organization acting directly and specially in view of the interests of shipper and receiver, and the maintenance of such regulations as will promote the interests of this highly important department of business.

Freight tariffs are carefully watched that no unjust discrimination is made against the country shipper, and that he may enjoy all reasonable facilities for the favorable prosecution of his business; a careful oversight is kept with regard to the inspection of consignments, that no injustice is done to the owner or consignor; the language and phraseology of bills of lading are scrutinized; in short, the varied details, as well as the general management which belong to this department, are studiously considered by merchants, whose experience and character insure a faithful and able discharge of duty. The officers are: Geo. M. How, President; Geo. H. Sidwell, Vice-President; A. M. Henderson, Treasurer; H. H. Carr, Secretary.

The above association is a voluntary organization formed within the membership of the Board. Its province is advisory, and its method, after full discussion and digestion of any proposed measures, is to submit the same to the Board of Directors for approval and action. It has been of great service in the correction of many abuses, and in the creation of rules and regulations to protect and facilitate the business of country shippers.

THE HENNEPIN, AND THE ILLINOIS & MICHIGAN CANALS.

Under the direction of the Secretary of War surveys of the so-called Hennepin Canal, and of the Illinois and Michigan Canal by U. S. Engineers, were long since completed; the two bills are now pending before Congress, the one asking the acceptance of the Illinois and Michigan Canal, upon the condition of its enlargement at the expense of the general government, the other praying for an appropriation for the construction of the Hennepin Canal, in accordance with the official survey. The Committee on Railways and Canals reported the latter bill to the House, with the recommendation by a vote of eight to two, that the bill pass; it now stands on the calendar to be taken up when reached in the regular order. The bill ceding the Illinois and Michigan Canal to the national government, was introduced by Senator Cullom, and was referred to the Committee on Commerce.

The Illinois and Michigan Canal extends from the Chicago River in this city southwesterly ninety-six miles to La Salle, on the Illinois River. The Hennepin survey having in view the connecting of the Illinois and Mississippi Rivers, extends from the Illinois River northwesterly sixty-four, sixty-five, or seventy-five miles, depending upon one of these three surveys for a western terminus. These surveys propose a channel eighty feet wide at the water surface, which is ten feet wider than the Erie Canal, and a water depth of seven feet, and also propose steam as a motive power. The estimated cost for the enlargement of the Illinois and Michigan Canal is \$2,299,000, and for the construction of the Hennepin Canal, the branch from the Rock River and the right of way, is \$6,673,000. As long ago as in 1872, a committee appointed by the U.S. Senate to discover what project could be devised to facilitate transportation to the seaboard, in the interest alike of the producer and the exporter, reported in an exhaustive review of this subject that the Hennepin Canal would, if built, save in cost of transport in a single year, in moving the surplus cereal products of Iowa and Minnesota alone, \$5,760,000. Observe that in this estimate the committee did not include any other kind of freight in either direction than the cereals as above defined. movement of grain has increased about 70 per cent since the year 1872, it is apparent that upon the basis of an extreme conservatism in calculation, the construction of these projected accessions to transportation facilities, would result in a large direct saving in cost of transport by water and a not inconsiderable saving indirectly as affecting all-rail rates from our agricultural regions to our grain centers. This enterprise commended by leading commercial bodies, and receiving the indorsement of the National Board, should by our representatives in Congress be hastened to its consummation, for although geographically it is intimately connected with Chicago, it is essentially and preëminently national in its character, and in all the benefits it seeks to confer. The importance of a continuous water way from the Mississippi to the Atlantic cannot be denied; its feasibility has been officially and conclusively shown. A city which receives and distributes 150,000,000 bushels of grain per annum besides dairy and other farm products, and which sends large supplies of manufactured goods and groceries westward, and whose activities benefit the producer in the West and the consumer in the East, and a state which pays \$25,000,000 internal revenue tax, \$4,000,000 custom dues, and \$11,-100,000 postal receipts per annum, together knock at the door of the National Treasury for a great national improvement and must not be denied. The interests of a vast agricultural territory whose products and wants are rapidly augmenting, and of the teeming populations of the eastern states, the prosperity of whose great manufacturing industries

depends largely upon a reasonable rate of wages, which in turn is regulated by an ample supply of good food at moderate cost, alike demand with unmistakable urgency the completion of this project now too long delayed.

A plentiful supply of food in manufacturing districts means low-priced labor, with good living. Good living at moderate cost must be enjoyed to produce contentment with low wages. These tend to social safety, and afford a good profit to manufacturers. Low-priced manufactured articles supply domestic requirements, diminish imports, and swell the value of exports. The encouragement of home manufactures by supplying mechanics and all skilled laborers with food at moderate cost, provides the farmer and producer with his necessities and luxuries, and furnishes for him a reliable market for his grain and produce. A multiplication of such relations must increase national wealth, contentment, and stability. These conditions are brought about to a very great extent by low rates of transportation from the cultivator to the mechanic and manufacturer, and are compelled by the force of competition. This effective competition must, in the nature of things, be water-way communication along the main routes of traffic. To postpone further this projected improvement would be nothing less than a deliberate refusal of the beneficent provisions which, in the topographical features of the country, the Creator holds out for our acceptance, and by means of which, we may regulate, in the interest of all industries, transportation of the necessaries of life, not only from the Mississippi to the Atlantic direct, but to all intermediate and divergent points.

All sections of the land should, with absolute unanimity, insist upon the immediate consummation of this enterprise on the part of the general government.

I am indebted for valuable information to the United States Agricultural Department and Bureau of Statistics, Messrs. Howard, White & Co., Messrs. Cowles & Ferren, and to general statistical literature of this and foreign countries.

Abruptly succeeding to the exacting and responsible duties of my official position, under circumstances at once difficult and exceptional, I desire to here record my grateful appreciation of the generous support of the membership of this Board.

I remain, Mr. President,

With sentiments of esteem,

Very respectfully, your obedient servant, GEORGE F. STONE, Secretary.

REPORT OF THE BOARD OF DIRECTORS.

CHICAGO, January 12, 1885.

To the Members of the Board of Trade of the City of Chicago:

Gentlemen,—In accordance with the requirements of the rules of this Association, your Board of Directors respectfully beg leave to submit their report of Receipts and Expenditures and an exhibit of the financial affairs, property, and general condition for the year 1884:

The available investments of the Board at the present time are:		
1.050 shares Chamber of Commerce stock, net cost.	\$78,792	32

In further compliance with the requirements of our rules, we have fixed the annual assessment upon each member for the year 1885 at \$50. This amount will be necessary to meet the current expenses of the coming year, because of the fact that owing to the failure to complete and occupy our new building, we shall receive no rent from it until the first of May next, while the interest on the bonds must be met, together with the ordinary expenses of the Board.

In accordance with the custom of past years, we wish also, to call your attention in this report to such subjects as we think demand your consideration.

We believe that the sale of so-called "visitors' tickets" has grown into a great abuse, never intended when their issue was first authorized. The amount received from this source has increased from \$4,865 in 1879 to \$8,995 in 1883, and we believe that many persons who come upon our floors on these tickets do not confine their acts to the legitimate privileges of the tickets, and that they would become members of our Board if deprived of the opportunity of purchasing a "visitor's ticket."

During the past year 212 privileges of membership have been transferred. These changes have kept the active working membership of the Board fully up to any former period of its history. As compared with former years, the volume of business done on the Board has been fully up to any previous year, the full statistics of which will be found in the Secretary's report, and with great pleasure we note that in this year of severe business reverses there has been no serious failure among our members.

The crowded condition of our floor during the past year, even under the depressing influence of continually declining markets, shows how neccessary is the change to our new quarters, which we now hope to make by the 1st of May next. Unavoidable delays consequent upon the completion of so large a building have kept us in our present rooms much longer than we expected. Our relations to the Chamber of Commerce under our present lease, and what is our duty to do in the matter, have been referred to our Executive Committee, who have taken steps looking to a final settlement of the existing relations, but no plan has been sufficiently matured that we can

report on at this time, and on the recommendation of our Executive Committee we have referred the matter to the Real Estate Managers of the Board, who have accepted the charge.

The continued success attending the operation of the Clearing House only proves the wisdom and importance of the plan, and we most heartily indorse the proposed system of checking trades through the medium of the same Clearing House force which was adopted last Saturday.

The experience of every year shows us that the rules which were sufficient and needful when we were a smaller body, and conducting a much smaller business, are not adequate to our present wants, and in these days, when disappointed speculators seek to evade the result of their failures and errors by resorting to the courts for relief from their obligations through some legal technicality, it is very important that our rules should be worded in plain and unmistakable language, and in exact conformity with the laws of the land, and your Directors propose that the Committee on Rules should, with the attorney of the Board, go over the rules, and put them in plain, proper, and unambiguous language, and then submit them to your approval.

All late decisions of the courts have been favorable to our claims that we are an independent body, with the right to control our own proceedings, privileges, and reports, and though we have not been able to dissolve all injunctions restraining us from withholding our market quotation messages from unworthy persons or firms, yet when these are reached to be argued they are invariably dissolved by the courts, and the vexatious delay in reaching them is only occasioned by the crowded dockets of the courts. And we are pleased to note that in our attempts to withhold our market quotation messages from such parties as make an improper use of them we are only working in line with such bodies as the New York and London Stock Exchanges, and the desperate attempts of some parties to retain possession of these messages, and the great sum of money said to be employed by them for the purpose, only shows the imperative need for this Board of Trade to firmly maintain its present position, and not permit these messages to be used by any person solely for gambling purposes, and in justice to itself and the world this Board should not take one backward step in the contest forced upon it in this matter.

A room is being prepared in our new building for conducting a call board, and though there may be some diversity of opinion as to its utility or benefit as an auxiliary of this Board, the system has many strong adherents among our members, and your attention is called to this matter now that needed action may be taken to conduct it in conformity with our rules if it is to be established.

Notwithstanding the continued litigation forced upon us, our legal expenses have been reduced to the minimum, when we consider the talent we must employ to meet the eminent ability of our opponent's counsel, and to give needed advice to a body representing such extended interests as ours.

In view of the necessary increase of expenses that must follow our change of quarters, a committee of this body have commenced inquiry to ascertain if our revenues can be increased in any proper way, and as this is a question which concerns every member of the Board we ask that all shall take it into their personal consideration, and any suggestion will be carefully considered.

As you are doubtless well aware, every year increases the amount of work brought before the Board of Directors, and many cases come before them which should only be heard by the Committee of Arbitration. Some of these are brought to the Directors for want of proper understanding of their official functions by one or both of the parties in the case, and we would suggest the creation of a Committee on Claims, who shall pass upon all cases in dispute and decide by what body they shall be heard.

xxxiv

During the past year the Call Board, an independent organization from this, was dissolved, immediately following which event an afternoon session of this Board was established, from 2 to 2:30 o'clock, in the main hall. This session has taken the place of the Call Board for the present, while in our crowded quarters, and has fully met all the needs of the Board for an afternoon session to fill late orders, aiding largely in doing away with irregular trading and curbstone quotations.

Your Directors consider it a settled question that this Board should make provisions before going into the new building for dealing in smaller lots of produce for future delivery than our rules now provide for, and we call your attention to this matter that suitable preparatory action may be taken.

Serious complaints are made of the frequent violation of our commission rule by some of our members, and while we believe that the best interests of this Board demand that this rule shall be strictly adhered to, your Directors and your Committee on Commission find it very difficult, without your full coöperation, to prove any violation, and we call upon you all to aid us in detecting any breach of this rule, and then we pledge you our earnest efforts for its stricter enforcement.

The attention of your Committee on Transportation has been directed to the unjust and injurious discrimination against Chicago as a shipping point by some of the railroads, and they recommend a more united action on the part of this Board with the wholesale merchants of our city, to see if we cannot receive equal privileges with the most favored points.

Early in the year Mr. Charles Randolph, the Secretary of this Board, who had filled the office for fifteen years, felt compelled to resign the position which he had so long and so ably filled. This resignation we were obliged to accept, although we knew it created a vacancy we could not easily fill. Mr. George F. Stone was called to the position of Assistant Secretary, to take his place when Mr. Randolph's resignation took effect. After serving as assistant for four months Mr. Stone was elected Secretary, and we wish to congratulate this Board on securing so able, faithful, and courteous an officer.

During the past year ten of our number have been removed from us by death. In our hurried march, in the rush and whirl of our business, we are too apt to forget these constant reminders that we, too, are mortal, that soon we, too, shall be with the silent majority.

The business year upon which we are just entering seems to promise a revival from the depression of the past months, and governed by the same aggressive spirit which has characterized the history of this association, its future prosperity is not doubtful or uncertain.

Respectfully submitted per order of and adopted by the Board of Directors.

E. NELSON BLAKE, President.

REPORT OF THE BOARD OF REAL ESTATE MANAGERS.

To the Directors and Members of the Board of Trade:

GENTLEMEN,—We respectfully submit herewith our report of receipts and expenditures account the new Board of Trade building for the year 1884:

xxxvi .

Work upon the building is being pressed vigorously, and we are confident of having it ready for occupancy on May 1 next. The office portion of the building is nearly finished, the bulk of the work remaining to be done being in the Exchange room.

Quite a number of offices have been rented since the day fixed for the public rental of the same, and the Managers expect that when members come to examine the building, and note the superior advantages its offices possess, they will be desirous of availing themselves of the rentals offered them.

The building is now covered by insurance in the amount of over one million of dollars, and especial precautions have been taken against fire by the establishment of an efficient night watch, and a careful supervision during the day by the Superintendent and others.

We remain, gentlemen,

Very respectfully yours,

E. NELSON BLAKE,
WILLIAM DICKINSON,
JOHN R. BENSLEY,
D. W. IRWIN,
CHAS. COUNSELMAN,
Board Real Estate Managers.

CHICAGO, January 12, 1885.

REPORT OF THE TREASURER.

CHICAGO, January 6, 1885.

To the President and Directors of the Board of Trade of the City of Chicago:

Gentlemen,—As your Treasurer for the past year, I beg to report that I have received in sundry deposits from the Secretary of the Board since my last annual report—

The snm of	
Total to be accounted for	•
Leaving balance in my hand, January 5, 1885	• ,
to	153 51
Leaving a balance of	\$24 619 72

Very respectfully yours,

BYRON L. SMITH, Treasurer.

Up to 1856 no record was kept of distinctly immigrants, separated from arrivals of alien passengers. Of the number of immigrants arriving during the year ended Jnne 30, 1884, 55,918 were from England; 63,344 from Ireland; and 10,032 from other parts of Great Britain: 176,676 from Germany; 43,526 from Sweden and Norway: 16,974 from Italy; 13,534 from Austria, and 72,703 from other countries in Europe: 60,584 from British North American Provinces; 279 from China, and the remainder in small numbers from various countries. The total immigration for ten years, ended June 30, 1884, is 3,893,230; of which 1.093,134 came from Germany, and 1,026,330 from Great Britain and Ireland; 390,971 from Sweden and Norway; 128,192 from Italy; 119,778 from Austria, and 377,638 from other countries in Europe.

EUROPEAN WHEAT CROPS.

Approximate Product of Wheat in the Under-mentioned Countries for the Past Ten Years.

Compiled mainly from reports gathered by the United States Agricultural Department, partly official and partly from estimates by persons occupying exceptionally good positions for determining the facts.

(c) In the case of Bavaria, 1863; and in that of Prussia, 1867 (b) Crop of average year. (a) Estimate of London "Times."

* These figures may be regarded as an approximation to the average what product of Europe, for a period of several years, ending with 1873, and are the result of an inquiry suggested by the International Statistical Congress, which met at St. Petersburg in 1872.

The crop of Holland is reported at 5.500.000 bushels, making the total European wheat production for 1884, as compiled from recent reliable and official information, 1,204,636,120 bushels. It should be observed, that by reason of defective statistical facilities, which prevail in some of the European countries, the crop returns from such regions are little better than commercial guesses; such estimates, however, are made by those whose opinions on crop statistics are entitled to special and

official respect, and are regarded as closely approximating to the facts.

The figures representing the crop of 1884 are chiefly from estimates returned by Edmund J. Moffat, the European Agent of the United States Department of Agriculture, who has furnished valuable contributions to the literature of European Agricultural Statistics.

PUBLIC DEBT OF THE UNITED STATES.

(Official.)

In the last seventeen amounts the cash in the Treasury is deducted from the aggregate debt, and bonds issued in aid of the Pacific Railroads are not included; these amounted, on the first day of January, 1885, to \$108,050,475 32, including interest paid by the United States.

DETAILED STATEMENT

Of the Public Debt of the United States, December 31, 1884.

Character of Debt.	Amount Outstanding.
DEBT BEARING INTEREST.	
Four and a half per cent. (Funded Loan) payable after September 1, 1891, \$250,000,000 00 Four per cent. (Funded Loan) payable after July 1, 1907 737,696,950 00 Four per cent. Refunding Certificates 260,000 00 Three per cent. (loan of July 12, 1882) payable at the pleasure of the Government 194.190.500 00	
Three per cent. Navy Pension Fund14,000,000 00	\$1,196,147,450 00
Debt past due upon which interest has ceased since maturity Interest due and accrued, but not yet paid	6,993,925 26 11,452,132 09
DEBT BEARING NO INTEREST.	
Old Demand Notes \$58,240 00 Legal Tender Notes 346,681,016 00 Fractional Currency 6,971,343 36 Certificates of Deposit (Currency) 24,920,000 00 Certificates of Deposit (Gold) 119,631,150 00 Certificates of Deposit (Silver) 138,168,291 00	636,430,040 36
Total Debt	\$1,851,023,547 71 432,475,176 31
Total Debt, less cash in the Treasury Corresponding statement December 31, 1883	\$1,418,548,371 40 1,498,041.723 80
Reduction of Debt in 1884 Reduction of Debt in 1883 Reduction of Debt in 1882 Reduction of Debt in 1882 Reduction of Debt in 1881 Reduction of Debt in 1879 Reduction of Debt in 1878 Reduction of Debt in 1877 Reduction of Debt in 1877 Reduction of Debt in 1877 Reduction of Debt in 1876 Reduction of Debt in 1875	\$79,493,352 40 100,501,953 04 157,948,040 25 133,690,018 90 112,616,768 88 16,849,606 22 17,307,331 70 46,965,799 02 26,910,953 46 22,766,106 75
Total Reduction of Debt in ten years	\$715,049,930 62
Annual Interest Charge on Debt as it stood December 31, 1883	\$49,436,033 50 47,113,993 00
Reduction of Annual Interest Charge during 1884	\$2,322,040 50
Six per cent. Bonds issued in aid of Railroads not included in the above Statement. For these Bonds the Government holds a lien upon the several lines. Issued to Union Pacific Railroad \$27,236,512 00 Issued to Central Pacific Railroad \$25,885,120 00 Issued to Kansas Pacific Railroad \$6,303,000 00 Issued to Western Pacific Railroad \$1,970,560 00 Issued to Sioux City and Pacific Railroad \$1,628,320 00 Issued to Central Branch Union Pacific Railroad \$1,600,000 00	\$64,623,512 00
Balance of Interest paid by the United States \$43,426,963 32 Interest accrued but not due 1,938,705 36	45,365,668 68
Total Principal and Interest	\$109,989,180 68 107,497.217 97
Increase of Interest Balance during 1884	\$2,491,962 71

RECEIPTS OF FLOUR AND GRAIN

At the principal Western River and Lake Ports, for each year, 1880 to 1884, inclusive.

· Ports.	Flour, barrels.	Wheat, bushels.	Corn. bushels.	Oats. bushels.	Rye. bushels.	Barley, bushels.	Total. equal to bushels.

Note.—Up to 1850 only the aggregate valuations in the several counties were reported to the State officers, and from 1852 to 1857 inclusive, a few counties returned only the aggregates; hence the details of Real Estate and Personal Property valuations are not complete for those years. In 1867 and 1868 the details of valuation are not entirely correct, owing to changes by the operation of the equalization law; since 1868 the valuations are as equalized. The total valuations in each of the several years are entirely correct and official.

The valuations for 1873 as equalized are largely in excess of any previous year. In 1874 some changes were made in the manner of equalizing the assessments, resulting in reducing all the valuations, but especially that of Railroad Property.

The State Debt, as noted, represents it as it stood on the 1st of January in each of the several years to 1869; in 1869 and 1870, as it stood December 1; in 1871, as it stood December 31; from 1872 to 1879, as it stood December 1.

Showing the Valuations of Real Estate and Personal Property in the City of Chicago for purposes of taxation. Also the Amount of Taxes levied, and the Public Debt of the City in each year since 1849.

Note.—From 1851 to 1862, inclusive, a Lamp Tax of half a mill to two mills was levied on certain portions of the city, and is included in the above Total Tax. The city debt as noted represents it as it stood on February 10 in 1852 to 1854, inclusive; on February 1 in 1855 to 1861, inclusive; on April 1 in 1862 to 1874, inclusive; and on December 31 since 1874. Valuations for 1875 to 1883, inclusive, are by the County assessment, as equalized by the State Board of Equalization, and in some of these years do not include railroad property. City tax on railroad property for 1883, something over \$100,000 for each year, not included in the above Total Tax.

CANAL STATISTICS—(OFFICIAL).

1848 to 1884, inclusive.

The following Statement shows the Expenses of Repairs. Renewals, etc., also the Amount of Tolls collected, together with the dates of the Opening and Closing of the Illinois and Michigan Canal.

Previous to 1871 no reliable returns were made of the Summer Packing; it was, however, inconsiderable.

For the calendar years of 1883 and 1884 the Packing in Chicago was approximately as follows:

1883. 1,077,823 1,470,000

1884.

January 1 to March 1...... March 1 to November 1..... November 1 to December 31. 685,000

1,900,000 1,454,000

Total 4,347,823.

Total 4,039,000.

COMPARATIVE STATEMENT

RULES GOVERNING THE INSPECTION OF GRAIN

IN THE CITY OF CHICAGO, STATE OF ILLINOIS,

In force from and after December 1, 1884.

The following are the rules adopted by the Board of Railroad and Warehouse Commissioners, establishing a proper number and standard of grades for the inspection of grain, as revised by them. The same took effect on the first day of December, 1884, in lieu of all rules on the same subject heretofore existing.

RULE I.—WINTER WHEAT.

No. 1 White Winter Wheat shall be pure White Winter Wheat, or Red White Winter. and White mixed; sound, plump, and well cleaned.

No. 2 White Winter Wheat shall be White Winter Wheat, or Red and White mixed; sound, and reasonably clean.

No. 3 White Winter Wheat shall include White Winter Wheat, or Red and White mixed; not clean and plump enough for No. 2, but weighing not less than fifty-four pounds to the measured bushel.

No. 4 White Winter Wheat shall include White Winter Wheat, damp, musty, or from any cause so badly damaged as to render it unfit for No. 3.

No. 1 Long Red Winter Wheat shall be pure Red Winter Wheat of the Long Red. long-berried varieties; sound, plump, and well cleaned.

No. 2 Long Red Winter Wheat shall be of the same varieties as No. 1, sound, and reasonably clean.

Turkish Red Winter Wheat.—The grades of Nos. 1 and 2 Turkish Red Turkish Winter Wheat shall correspond with the grades of Nos. 1 and 2 Red Winter Winter. Wheat, except that they shall be of the Turkish variety.

In case of mixture of Turkish Red Winter Wheat with Red Winter Wheat, it shall be graded according to the quality thereof, and classed as Turkish Wheat.

No. 1 Red Winter Wheat shall be pure Red Winter Wheat of both light Red Winter. and dark colors of the shorter-berried varieties; sound, plump, and well cleaned.

No. 2 Red Winter Wheat shall be Red Winter Wheat of both light and dark colors; sound, and reasonably clean.

No. 3 Red Winter Wheat shall include Red Winter Wheat not cleaned and plump enough for No. 2, but weighing not less than fifty-four pounds to the measured bushel.

No. 4 Red Winter Wheat shall include Red Winter Wheat, damp, musty, or from any cause so badly damaged as to render it unfit for No. 3.

In case of the mixture of Red and White Winter Wheat, it shall be Mixture. graded according to the quality thereof, and classed as White Winter Wheat.

No. 1 Colorado Wheat shall be sound, plump, and well cleaned. Colorado.

No. 2 Colorado Wheat shall be sound, reasonably clean, and of good milling quality.

No. 3 Colorado Wheat shall include Colorado Wheat not cleaned and plump enough for No. 2, but weighing not less than fifty-four pounds to the measured bushel.

RULE II.—SPRING WHEAT.

Hard Spring.

- No. 1 Hard Spring Wheat shall be sound, plump, and well cleaned.
- No. 2 Hard Spring Wheat shall be sound, reasonably clean, and of good milling quality.

Spring Wheat.

- No. 1 Spring Wheat shall be sound, plump, and well cleaned.
- No. 2 Spring Wheat shall be sound, reasonably clean, and of good milling quality.
- No. 3 Spring Wheat shall include all inferior, shrunken, or dirty Spring Wheat, weighing not less than fifty-three pounds to the measured bushel.
- No. 4 Spring Wheat shall include Spring Wheat, damp, musty, grown, badly bleached, or for any cause which renders it unfit for No. 3.

Black Sea and Flinty Pfife Wheat shall in no case be inspected higher than No. 2, and Rice Wheat no higher than No. 4.

RULE NO. III.—CORN.

Yellow.

- No. 1 Yellow Corn shall be yellow, sound, dry, plump, and well cleaned.
- No. 2 Yellow Corn shall be three-fourths yellow, dry, reasonably clean, but not plump enough for No. 1.
- No. 3 Yellow Corn shall be three fourths yellow, reasonably dry, and reasonably clean, but not sufficiently sound for No. 2.

White.

- No. 1 White Corn shall be sound, dry, plump, and well cleaned.
- No. 2 White Corn shall be seven-eighths white, dry, reasonably clean, but not plump enough for No. 1.
- No. 3 White Corn shall be seven-eighths white, reasonably dry, and reasonably clean, but not sufficiently sound for No. 2.

No. 1.

No. 1 Corn shall be mixed Corn of choice quality, sound, dry, and well cleaned.

No. 2.

No. 2 Corn shall be mixed Corn, dry, reasonably clean, but not good enough for No. 1.

No. 3.

No. 3 Corn shall be mixed Corn, reasonably dry, and reasonably clean, but not sufficiently sound for No. 2.

No. 4.

No. 4 Corn shall include all Corn not wet or in heating condition, that is unfit to grade No. 3.

RULE IV.—OATS.

White.

- No. 1 White Oats shall be white, sound, clean, and reasonably free from other grain.
- No. 2 White Oats shall be seven-eighths white, sweet, reasonably clean, and reasonably free from other grain.
- No. 3 White Oats shall be seven-eighths white, but not sufficiently sound and clean for No. 2.
- No. 1.
- No. 1 Oats shall be mixed Oats, sound, clean, and reasonably free from other grain.

No. 2 Oats shall be sweet, reasonably clean, and reasonably free from No. 2. other grain.

No. 3 Oats shall be all Oats that are damp, unsound, dirty, or from any No. 3. other cause unfit for No. 2.

RULE V.—RYE.

No. 1 Rye shall be sound, plump, and well cleaned.

No. 1.

No. 2 Rye shall be sound, reasonably clean, and reasonably free from No. 2. other grain.

No. 3.—All Rye, damp, musty, dirty, or from any cause unfit for No. 2, No. 3. shall be graded as No. 3.

RULE VI.—BARLEY.

No. 1 Barley shall be plump, bright, clean, and free from other grain. No. 1.

No. 2 Barley shall be sound, of healthy color, not plump enough for No. No. 2. 1, reasonably clean, and reasonably free from other grain.

No. 3 Barley shall include slightly shrunken and otherwise slightly dam- No. 3 aged Barley, not good enough for No. 2.

No. 4 Barley shall include all Barley fit for malting purposes, not good No. 4. enough for No. 3.

No. 5 Barley shall include all Barley which is badly damaged, or from No. 5. any cause unfit for malting purposes, except that Barley which has been chemically treated shall not be graded at all.

Scotch Barley.—The grades of Nos. 1, 2, and 3 Scotch Barley shall correspond in all respects with the grades of Nos. 1, 2, and 3 Barley, except that they shall be of the Scotch variety.

These rules shall be in force on and after December 1, 1884, but it is provided that all grain in store on said date, inspected in under the rules hereby amended, shall be inspected out in accordance with the provisions of said rules.

RULE VII.

The word "new" shall be inserted in each certificate of inspection of a newly harvested crop of Oats until the 15th of August, of Rye until the 1st day of September, of Wheat until the 1st day of November, and of Barley until the 1st day of May of each year. This change shall be construed as establishing a new grade for the time specified, to conform in every particular to the existing grades of grain, excepting the distinctions of "new" and "old."

RULE VIII.

All grain that is warm, or that is in a heating condition, or is otherwise unfit for warehousing, shall not be graded.

RULE IX.

All inspectors shall make their reasons for grading grain, when necessary, fully known by notations on their books. The weight alone shall not determine the grade.

RULE X.

Each inspector is required to ascertain the weight per measured bushel of each lot of Wheat inspected by him, and note the same on his book.

Section 138. "Any person who shall assume to act as an Inspector of Grain, who has not first been so appointed and sworn, shall be held to be an impos-

tor, and shall be punished by a fine of not less than \$50 nor more than \$100 for each and every attempt to so inspect Grain, to be recovered before a Justice of the Peace.

"Any duly authorized Inspector of Grain who shall be guilty of neglect of duty, or who shall knowingly or carelessly inspect or grade any Grain improperly, or who shall accept any money or other consideration, directly or indirectly, for any neglect of duty, or the improper performance of any duty, as Inspector of Grain, and any person who shall improperly influence any Inspector of Grain in the performance of his duties as such Inspector, shall be deemed guilty of a misdemeanor, and, on conviction, shall be fined in a sum of not less than \$100 nor more than \$1,000, in the discretion of the Court, or shall be imprisoned in the county jail not less than three nor more than twelve months, or both, in the discretion of the Court."

The said Chief Inspector, and all persons inspecting Grain under his direction, shall in no case make the grade of the Grain above that of the poorest quality found in any lot of Grain inspected, when it has evidently been "plugged" or otherwise improperly loaded for the purpose of deception. Wheat which has been subjected to "scouring" or to any process equivalent thereto, shall not be graded higher than No. 3.

All persons employed in the inspection of Grain shall report all attempts to defraud the system of Grain inspection as established by law. They shall also report to the said Chief Inspector, in writing, all instances where warehousemen deliver, or attempt to deliver, Grain of a lower grade than that called for by the warehouse receipt. They shall also report all attempts of receivers or shippers of Grain to instruct or in any way influence the action or opinion of the Inspector, and the Chief Inspector shall report all such cases to the Commissioners.

COMMISSIONS.

The following schedule has been adopted by the Board of Trade as the minimum rates of Commission Charges to be made by members of the Board for the sale on consignment, purchase and sale in the Chicago market, and purchase and shipment, of Grain, Provisions, and the other classes of property named.

For the Sale of Property on Consignment.

VISIBLE SUPPLY OF GRAIN.

A statement comprising the weekly stocks of Grain in regularly authorized warehouses at prominent Grain centers of the United States and Canada, excepting California; also, including quantity estimated as in transit from the principal interior points of shipment (avoiding, however, in such estimate, the duplication of shipments), presenting the visible supply of Grain in the United States and Canada not disposed of with reference to ultimate destination, but easily obtainable to influence the markets or to supply any unexpected demand.

ALL-RAIL THROUGH BUSINESS.

The following statement shows the amount of Flour and Grain received at Chicago during 1884 by Western Railways, and delivered to connecting lines without passing through a Chicago Warehouse. These amounts are all included in the general statements of Receipts and Shipments published herewith, except Shipments originating in Milwaukee; these are deducted from the Receipts and Shipments of Chicago, as shown by the general statements, but are included in this.

Received by Chicago & Northwestern Railway.

PRICES OF HIGHWINES.

The following table indicates the current prices of Highwines for each week during the year 1884. The actual sales of Highwines in Chicago are quite restricted, but the quotations form a recognized standard, upon which are based prices for all kinds of Distilled Spirits, including Alcohol. Manufacturers of Vinegar and Rectifiers are almost the sole buyers of Highwines.
